The bulkhead construction is nearly complete. A final grouting of the bulkhead will be done soon. The ERRS construction Task Order ceiling is for \$1,380,500. The START contract Technical Direction Document (TDD) for technical support cost ceiling is \$90,000, however, all work will need to be completed before the final accrued costs can be calculated.

Thanks, David, for sending the costs. Reporter has a few additional questions, which we've addressed with other reporters already. Is the following good to go?

Thanks,

Christie

With the construction of the GKM temporary treatment facility, does this mean the EPA does not have any plans to build a permanent facility at the site? Is the purpose of the temporary treatment plant to make sure there is something in place before winter as a precursor to a facility to be built later on?

## Attorney Client/Ex. 5

I also was wondering what the cost of the temporary plant will be and where those funds will

come from.

# Attorney Client/Ex. 5

Is the Red and Bonita bulkhead project still ongoing? What is the cost for that and when is it going to be completed?
